REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a method of wireless differential communications. A search of prior art records has failed to teach or suggest alone or in combination a method of wireless differential communication comprising:

“generating a plurality of baseband signals based on Cayley-encoded input data; modulating said baseband signals on a carrier to form carrier-level signals; and transmitting said carrier-level signals from at least one antenna” as disclosed in claim 1.

“receiving receive carrier-level signals, each of which is formed from at least one transmit carrier-level signal transmitted from at least one transmitter antenna passing through a channel, using at least one receiver antenna; demodulating said receive carrier-level signals to recover a plurality of Cayley-encoded receive baseband signals; and processing said receive baseband signals to obtain data represented thereby” as disclosed in claim 14.

“generating a set, $\{A_q\}$ of fixed $M \times M$ complex Hermitian matrices for which $\xi(V)$ satisfies a maximization criterion and $\xi(V)$ is defined by” the equation as disclosed in claim 21.

“generating a set, at, of real-valued scalars according to the following equation:

$$d = -\tan(\theta/2)$$

for every θ in the set $\{\theta\} = \{\pi/r, 3\pi/r, 5\pi/r, \dots, (2r-1)\pi/r\}$ ” along with the remaining limitations of claim 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
